GLOBAL EVENTS & INVESTMENT MARKET IMPACT

Members and pensioners have probably been watching recent unfolding market events with great concern, and the impact of this reflected in the monthly returns of the various Sentinel investment portfolios.

Sentinel members and pensioners can rest assured. The Board of Trustees and Investment Committee monitors these events in the market constantly and, if deemed necessary, take specific action to protect portfolios against the adverse effects of short-term volatility where possible.

The Fund has an investment strategy that is designed to achieve specific objectives over the long-term. Short-term volatility and periods of negative monthly returns, as evident in the published monthly investment returns, should be seen in context of long-term objectives which Sentinel has a track record of achieving.

Members and Pensioners can be assured of our commitment to preserve your savings and future pensions.
