## SENTINEL MINING INDUSTRY RETIREMENT FUND MINE EMPLOYEES PENSION FUND

### MEMBER INVESTMENT CHOICE ENHANCEMENT

The Funds have enhanced the Member Investment Choice (MIC) options to now also allow the investing of a **portion** of your Fund Credit in the Money Market Portfolio. Previously, your Fund Credit could not be split between the Money Market Portfolio and another MIC portfolio (excluding the 100% Capital Protection Portfolio). You are, therefore, now able to split your Fund Credit between the Money Market Portfolio and one of the other MIC portfolios.

**Example:** A member can now invest, say, 50% of his/her Fund Credit in the Pension Protector Portfolio, 25% in the Money Market Portfolio and 25% in the 100% Capital Protection Portfolio. In-addition, future monthly contributions can also be invested in one of the available MIC portfolios (excluding the 100% Capital Protection Portfolio).

Members are reminded that:

- Any MIC election must be exercised in writing by completing the Member Investment Choice Election Form and submitting this to the Funds.
- They must ensure that they have a complete understanding of the possible implications of exercising a MIC option.

**Please contact the Funds if you require any further information regarding Member Investment Choice.**
